DETAILED ACTION

Election/Restrictions

1. Pursuant to the requirement for election of species, applicants have elected the compound of Example 59, a compound where Y is a morpholino group. Claims 1-21, 23 and 25-50 are readable thereon. Claims 22 and 24 stand withdrawn as not being readable on the elected species.

Improper Markush Rejection

2. Claims 1-21, 23 and 25-50 are rejected as being improper Markush claims in the definition of the Y heterocyclic groups. So substituted, the resulting total compounds lack a common core and are structurally diverse and patentable distinct one from the others. A reference anticipating one under 35 USC 102 would not be a reference against the others under 35 USC 103. Diverse fields of search in the U.S. classification system and in STN/CAS are also involved. Limitation of the claims to compounds where Y is a morpholine group (X is O), encompassing the elected species, will overcome this rejection. Note also that the piperazine subject matter (X in the Y definition is N) of the parent patent is present in generic claims of the present application.
